Policy Years 11+	3.00%	3.00%	Equal to interest rate credited to the Fixed Account Loan Balance
Participating Loan ³ (For policies that include Participating Loans)	5.90%		5.90%

Surrender Charge Schedule: 14 years

¹ Market indices do not include dividends paid on the underlying stocks, and therefore do not reflect the total return of the underlying stocks. Although the policy value may be affected by the performance of an index, the policy is not a security and does not directly or indirectly participate in any stock, equity or similar investment including, but not limited to, any dividend payments attributable to any such investment.

² The caps shown for the 2-Year Cap Base and the 2-Year Cap Plus Strategies are not annualized. The rate shown is the highest rate of interest that can be credited at the end of the two-year segment. Interest, if any interest is credited, will be credited only at the end of each two-year segment.

³ Depending on the actual interest rate charged and the index-linked crediting rate, participating loans may amplify positive or negative policy performance.

Withdrawals or Loans

A withdrawal may be free of federal income tax or "tax-free." If the policy is not a Modified Endowment Contract (MEC), then, except for certain changes in the policy during the first 15 policy years and especially during the first five policy years that cause cash distributions that may be taxable although they do not exceed investment in the contract (Basis), withdrawals are not taxable to the extent that they do not exceed Basis. Policy loans are free of federal income tax when taken except if the policy is or becomes a Modified Endowment Contract (MEC). If the policy is a MEC, a distribution (withdrawal or policy loan, including any increase in the policy loan balance because of unpaid loan interest) is taxable to the extent that policy value exceeds Basis. A 10% penalty tax may apply to distributions from a MEC if the policyholder is under age 59½. Basis is premium paid minus nontaxable amounts previously recovered through policy loans taken from a MEC and withdrawals. Assignment or pledge of a MEC as security for a loan would also be a taxable event. If the policy becomes a MEC, then any distribution (withdrawal or policy loan) taken in the policy year in which the policy becomes a MEC and in subsequent policy years is taxable the same as a distribution from a MEC. Any distribution taken within two years prior to the policy becoming a MEC may also be taxable the same as a MEC. Termination, other than by reason of the insured's death, of a life insurance policy with a policy loan balance may be deemed a distribution of the outstanding policy loan balance, resulting in possible adverse tax consequences for a policy that is not a MEC. Consult a tax advisor about possible tax consequences. We are not responsible for any adverse tax consequences.
