

Performance Report

Average Annual Total Return Performance Report as of April 30, 2025

For contracts issued prior to October 29, 2002, and for contracts issued in FL and NJ prior to November 7, 2002, and for contracts issued in VT prior to March 3, 2003.

RetireReadySM Extra II
 a variable annuity issued by
 Genworth Life and Annuity Insurance Company

Insurance and annuity products:	Are not deposits.	Are not guaranteed by a bank or its affiliates.
May decrease in value.	Are not insured by the FDIC or any other federal government agency.	

MUST BE PRECEDED OR ACCOMPANIED BY CURRENT PRODUCT PROSPECTUS.

IMPORTANT INFORMATION

The following information is designed to help you better understand this performance report. Please read carefully and refer back to this section if you have any questions.

This report is authorized for use only when preceded or accompanied by a current product prospectus, which describes investment objectives, risk factors, fees, and charges that may apply, as well as other important information. Please read the prospectuses for the product and underlying portfolios carefully before you invest or send money.

About Us...

6610 West Broad Street
Richmond, VA 23230

Principal Underwriter

Capital Brokerage Corporation
6620 West Broad Street Building 2, Richmond, VA 23230
Member FINRA

Genworth Life & Annuity and Capital Brokerage Corporation are members of Genworth Financial.

About the Product...

Variable annuities are long-term investments designed for retirement purposes.

Variable products are sold by product prospectus, which describes investment objectives, risk factors, fees, and charges that may apply (e.g., mortality and expense, administrative charges, and surrender charges). The product prospectus also covers other features such as the death benefit and annuitization options.

The prospectuses for the underlying investments contain information on the investment objectives, risk factors, fees and charges as well as other important information about the funds and investment companies that should be carefully read and considered before investing. You can obtain the prospectus for the underlying investments by calling 888-GENWORTH.

Withdrawals/Surrenders

You may withdraw/surrender all or a portion of the contract value. We will not permit a withdrawal that is less than \$100 or that reduces contract value to less than \$1,000. If your withdrawal request would reduce contract value to less than \$1,000, we will surrender your contract in full. Surrender charges may apply.

Withdrawals/surrenders have the effect of reducing the contract value and any death benefits, including optional death benefits. Withdrawals/surrenders of taxable amounts are subject to ordinary income tax, and if taken prior to age 59½, an additional 10% federal penalty tax may apply.

RetireReady Extra II is a flexible premium variable deferred annuity, policy forms P1152 1/99, P5157 3/01, and P5161 3/01, not available in all states or markets. Features and benefits may vary by state. Ask your registered representative for details.

All guarantees, including death benefits, and Guarantee Account, are based on the claims-paying ability of Genworth Life & Annuity.

Portfolios

Variable annuities allow you to invest in portfolios that span the risk/reward spectrum. The value of a portfolio will fluctuate and, upon redemption, portfolio shares may be worth more or less than the original cost. Some portfolios are more volatile than others. Before investing, you should carefully read the applicable risk section in the portfolio prospectus.

High-yield securities portfolios are subject to greater credit risk and price fluctuations than portfolios that invest in higher-quality securities. The price yield of bond funds may fluctuate due to general market conditions and the credit quality of individual issues held in the fund. Bond prices are sensitive to interest rate changes, and a rise in interest rates will likely cause the prices of current bonds to decline. These portfolios are annotated in the tables with the superscript "H".

If you choose to invest in international portfolios, there are additional risks not associated with investing solely in the U.S. These risks include currency fluctuation, political risks, differences in accounting standards and the limited availability of information. These portfolios are annotated in the tables with the superscript "+".

Investing in real estate portfolios involves risks such as refinancing, economic conditions in the real estate industry, changes in property values, dependency on real estate management and other risks associated with a portfolio that concentrates its investments in one sector or geographic region. These portfolios are annotated in the tables with the superscript "R".

Portfolios that invest in stocks of small or emerging companies may have less liquidity than those of larger, more established companies and may be subject to greater price variability and risk than the overall stock market. These portfolios are annotated in the tables with the superscript "¶".

An investment in a money market portfolio is not insured or guaranteed by the FDIC or any other government agency. Although the portfolio seeks to preserve the net asset value (used to calculate portfolio share value) of your investment at \$1.00 per share, it is possible to lose money by investing in the portfolio.

These investment portfolios are not available to the general public directly and are only available in variable annuity and variable life insurance products. No assurance or representation is made that the investment results of any of the product's portfolios will be comparable to the investment results of any other similar portfolio available to the general public. This is true even if the other portfolio has the same investment advisor or portfolio manager, and/or has a similar name.

Fees & Expenses...

Annual Contract Charge

We deduct a charge of \$25 (assumed to be equivalent to 0.10% annually) from your contract value for certain administrative expenses incurred in connection with the contract. We will deduct the charge on each contract anniversary or if you fully surrender your contract. We will waive this charge if your contract value is at least \$10,000 on the contract anniversary date.

Asset Charge

We deduct from the portfolios an amount, computed daily, equal to an annual rate of 1.55% of the contract value in the Separate Account. We assess this charge when we compute the net investment factor. The asset charge reduces the value of Accumulation Units and Annuity Units. The charge consists of an administrative expense charge at an effective annual rate of 0.25% and a mortality and expense risk charge at an effective annual rate of 1.30%.

Portfolio Management Fees & Expenses

We deduct from the portfolios the fees imposed by the individual portfolios you have selected at the time the contract is put in force.

Surrender Charge

Performance results labeled "Contract Surrendered" reflect the deduction of a surrender charge. They also reflect the application of a free withdrawal privilege equal to 10% of purchase payments plus any gains. The surrender charge is a percentage of the purchase payments to date and varies by the number of years since any given purchase payment was made, as shown in the following table:

Completed contract years since purchase payment	0	1	2	3	4	5	6	7	8+
Surrender charge	8%	8%	7%	6%	5%	4%	3%	2%	0%

Optional Death Benefits...

Optional Guaranteed Minimum Death Benefit

The maximum charge for this rider is 0.35% of the prior contract year's average Guaranteed Minimum Death Benefit. The Optional Guaranteed Minimum Death Benefit accumulates your purchase payments by 6% annually to a maximum of twice the total payments and pays the greater of this amount or the basic death benefit. This rider is available to Annuitants age 75 or younger at contract issue.

Optional Enhanced Death Benefit Rider

The maximum charge for this rider is 0.35% of the prior contract year's average contract value. The Optional Enhanced Death Benefit Rider pays an additional amount equal to 40% of any gain (not to exceed 70% of purchase payments) to Annuitants aged 70 or younger at contract issue, or 25% of any gain (not to exceed 40% of purchase payments) to Annuitants aged 71 to 75 at contract issue. It is only available for issue ages 75 and younger.

About Past Performance...

These returns are based on the performance of Genworth Life & Annuity VA Separate Account 1 (VA Separate Account 1) investment options. Any performance that precedes the adoption date was derived by reducing the portfolio's actual performance during the period by the fees and charges that would have been imposed had the portfolio been in the policy during the period.

Performance results are calculated as if all the capital gains and dividends were reinvested. Performance results assume an initial investment of \$1,040 (\$1,000 hypothetical investment, plus a 4% bonus) at the beginning of the periods shown with no withdrawals/surrenders taken or additional investments during the period. Returns for periods of less than one year are not annualized. The items listed in the Fees & Expenses section were deducted from the portfolio's performance. State premium taxes are not reflected. Performance results labeled "Contract Surrendered" assume that the contract was surrendered at the end of the periods shown and reflect the deduction of a surrender charge. The surrender charge varies by the contract years since any purchase payment as described in the Surrender Charge section. Performance results labeled "Contract Not Surrendered" are calculated at the end of the period shown but do not deduct surrender charges.

VA Separate Account 1 average annual compounded total return figures are calculated at the end of the periods shown, unless a portfolio was not available in the Separate Account during those periods.

Standardized Performance

Maximum charges for optional riders are reflected. Performance is calculated from the Adoption Date.

Non-Standardized Performance

Charges for optional riders are not reflected. Performance is calculated from the underlying portfolio's Inception Date. This date may be different from the date the portfolio first became available in the contract. Performance that predates the adoption of this portfolio in the contract is therefore hypothetical in nature; it is noted in the tables with the symbol "****". The return is calculated as if the portfolio had been in the contract for the period shown.

Performance numbers are based on values provided by the portfolio management companies and are believed to be accurate; however, Genworth Life & Annuity

cannot independently verify them.

Adoption Date

The Adoption Date is the date the underlying portfolio became available in VA Separate Account 1.

Portfolio Inception Date

Portfolio Inception Date is the date the Securities and Exchange Commission (SEC) declared the underlying portfolio effective. Portfolio Inception returns are calculated from the portfolio Inception Date and not from the Adoption Date.

Explanation of Symbols

"NA" indicates that the performance for the period shown is not available. If a portfolio has not been available for the period shown, total return for the period it has been available, if any, is shown in the "Since Inception" and "Since Adoption" columns. The returns for subaccounts with a 12b-1 fee, noted in the tables with the symbol "\$", may reflect the historical performance of a different class of the underlying portfolio. For time periods before the portfolio's adoption of the rule 12b-1 plan, performance is restated based on the portfolio's 12b-1 fee.

S&P 500

The S&P 500® is comprised of approximately 500 leading companies in leading industries of the U.S. market with approximately 75% coverage of the U.S. stock market capitalization.

RetireReady Extra II

a variable annuity issued by

Genworth Life and Annuity Insurance Company

Average Annual Total Return Performance Report 04/30/2025

See Important Information beginning on page 2 for additional information including explanation of symbols used below.

The historic performance figures quoted represent past performance. The past performance illustrated is no guarantee of future results, and current results may be lower or higher than the figures quoted. The return and principal value of a portfolio will fluctuate and may be worth more or less than the original cost. The maximum surrender charge on this product is 8%.

Standardized Performance Assuming Contract Surrendered for the Quarter Ending 03/31/25

Includes deduction of maximum rider charges of 0.70%.
